

VERATEX DROP ARM AWNING SYSTEM

Flexibility coming your way may possibly be the unique Veratex Drop Arm Awning System - Intelligently designed to track the sun's movement while the angular shape will assist with the overall geometry of your facade.

- ▶ Compact and elegant semi-round or square cassette design ensures the fabric is completely protected from the harsh environment whilst the awning is not in use.
- ▶ The heavy-duty arm assembly uniquely moves outwards from the headbox while pivoting from the fixing point, this clever design efficiently tracks the sun's movement, without hindering operation of your windows.
- ▶ All components are manufactured from drop-forged aluminium, 6061 extruded aluminium, and marine grade 316 stainless steel fixings, all with a superior double baked enamel powder coat finish.
- ▶ Our textiles offer the very best compromise between visibility and light transmission while providing incomparable weather resistance and ease of maintenance.
- ▶ The Veratex Drop Arm Awning System utilises the latest German Engineering techniques and is ISO 9001 safety tested by German TUV (Product Safety Certification) made in Germany.  MADE IN GERMANY
